TOTALS	\$130,000,000

REPAIR 2020

MAJOR RENOVATIONS

(May include HVAC and lighting improvements, security improvements, window replacements, and upgrades to building finishes)

The 3 schools included were all listed as in need of renovation for consideration during the planning phase for the REPAIR 2016 program. They were postponed to allow for completion of additional elementary building major renovations and air conditioning projects.

ADDITIONS/EXPANSIONS

Levan Scott Academy and Franke Park Elementary both currently utilize modular classrooms requiring that staff and students leave the main building to access, which is a security concern. There is also significant population growth in the southeast sector of the district driving a need for additional classroom space.

CORRIDOR & LIGHTING IMPROVEMENTS

Corridor lighting and lockers are at the end of their useful life and are in need of replacement.

ENTRANCE VESTIBULE & OFFICE SECURITY MODIFICATIONS

Significant modifications and relocation of office areas are needed to complete the remaining nine schools that do not currently have a true secure vestibule entrance. Projects at Forest Park and Washington Elementary also include the addition of elevator access to all floors.

ADA ACCESSIBILITY IMPROVEMENTS

Repairs and modernization of existing elevators and lifts.

WINDOW REPLACEMENTS

Replacement of existing inefficient single pane window systems.

ROOF REPLACEMENTS

Ongoing roof replacement per the district's replacement schedule, based on warranty/lifecycle expiration. Needs projections currently exceed annual capital projects funding availability through 2026.

TEMPERATURE CONTROLS UPGRADE

Replace temperature controls systems that are technologically obsolete and no longer supported.

PROGRAM SOFT COSTS AND FINANCING

Program management, insurance and financing costs, and program contingency allowance.
