

School is at Home

There is a virus that is making people sick. My school is closed so

that students and teachers do not get sick. Even though I am at

home, I can still learn. My class meets on the computer instead

of at school. I pay attention to the teacher and participate in

class. It is important that I stay on topic and use kind words just

like I would at school. I will go back to school when it is safe to

learn there. Learning at home keeps me, my family, and my

friends safe and healthy. If I get worried about the virus, I can

talk to my family or teachers.
